About This Game

Hi!

We are a dad and a mom making Auri's Tales under the name of Dad's Indie Studio.
Auri's Tales is a tiny game by @amadeumartinez and @naretaa made with love and very few resources.

We are making this game in our free time, just for the pleasure of do it. We are in love with the idea of leaving it behind as a gift to our daughter, and we like to imagine that she one day will play a little 3D adventure designed by her fathers and placed in a fantasy world that is based on our own life.

About the game

Auri's Tales is a tiny 3D adventure game in which players will need to solve 12 quests to get access to the castle and complete the game. The whole game will be contained in one single level that works as a mini open world that players can freely explore and evokes to the classic 3D platformers.

Jim Henson's Labyrinth, Alice in Wonderland, The Little Prince, Zelda I, Mario 64, Conker Reloaded or Dark Souls are some of the influences that inspire this game in different ways.

Title: Auri's Tales
Genre: Adventure, Indie, Early Access
Developer:
Dad's Indie Studio
Publisher:
Dad's Indie Studio
Franchise:
Princess of Solea
Release Date: 12 Dec, 2018

a09c17d780

Minimum:

OS: Windows 7

Processor: Intel(R) Core(TM) i7-2600 CPU @ 3.40Hz

Memory: 2 GB RAM

Graphics: NVIDIA GeForce GT710

DirectX: Version 11

Storage: 1 MB available space

Oniisan:
Estou de greve!!!
Faz um ano que não recebo meu salário!!!

The screenshot displays a game interface with a central research tree and a sidebar on the right. The research tree consists of several nodes connected by lines:

- Industrial Espionage** (3 months) connects to **Globalisation**.
- Subzero Training** connects to **Globalisation**.
- Outsourcing** (7 months) connects to **Globalisation**.
- Globalisation** connects to **National Headquarters**.
- Globalisation** connects to **Deep Sea Exploration**.
- Globalisation** connects to **Patents**.
- National Headquarters** connects to **Planning Permission** (3 months).
- National Headquarters** connects to **Desert Expeditions**.
- Globalisation** connects to **Lobbying**.
- Lobbying** connects to **Regulatory Connections** (8 months).
- Regulatory Connections** connects to **Patents**.

The sidebar on the right contains the following information:

- Scientists:** HIRE and FIRE buttons. Cost: \$30/day. Current count: 0. All scientists: 50/day.
- Patents:** A single patent icon is shown. An **UPGRADE** button is visible below it.
- Next Upgrade:** Can patent cures up to level: 2 > 3.

The bottom navigation bar includes:

- Gameplay controls (play, pause, fast forward).
- Money: \$ UNLIMITED \$553.
- Production (gears icon).
- Ingredients (leaf icon).
- Cures (+ icon).
- RESEARCH** (lightbulb icon, highlighted in blue).
- Company (bar chart icon).
- Menu (hamburger icon).
- Progress: 20 JUL 2016.

I played this game to its crappy completion and all I can say is don't buy it. Not even if it is a dollar, too many good games out to play this garbage.. Apparently a clicking smartphone game..

To be honest, this game ain't worth the money i payed for it. I guess if you want cards, you could buy it for those..

Not Recommended. The game had a real potential, it truely did. Its gameplay was interesting, its graphics were uncommon, its musics were captivating and you'd get deep in the mood real quick. When I first saw this in early access, I couldn't wait for it to be released.

But alas, it failed to reach its own objective by casualizing its view and making it as simple as good, sometimes neutral and bad. This game, above all else, was supposed to give you a morale, to show you that you make choices, sometimes not understanding them on the first hand, then come to realize their consequences later on, or even immediately. But as other reviewers have pointed it out, the morale becomes as simple as "war is bad", and you can't really get in the mood when you realize that the whole point of the game is to tell you not to be racist, to help elderly people in the street and not to be a nice little person. The writing is poor, and I'm really saddened to write this as I was taken by some levels during the early access so bad I'd play them over and over just to get into it again, but not anymore.

To summarize :

**** Pros ****

- Interesting graphics
- Good music that puts you right in the mood
- A starting idea that could've gone very far

**** Cons ****

- Very short game
- Terrible writing
- Ok-ish gameplay at best. LOVE this expansion!!!! I feel like the game truly matured with all these new fates. You guys rock so damn hard. For 5 bucks this is twice the game. PLEASE keep making content for this lovely creation! Found a couple of minor bugs though:

Monks quest 3 has a few typos

If you have the curse that prevents the last enemy from being countered you cant finish the warrior trials where you need to counter all enemies.

Thank you for this experience, seriously. Love this game.. Runs well, no \u2665\u2665\u2665\u2665\u2665\u2665t and has all the features you would expect Minesweeper to have.

You get exactly what it says in the title, what's more to love?. An extremely fun game to play with friends. But to be critical, long play sessions do make you wish for more gamemodes and the lack of online play does hurt the game.. Great Game! Great story! Wish it was a little more longer though. I got really into the story.. Questerium is a pretty good hidden object / puzzle game. The thing that makes it most enjoyable, however, is the cheesy, over the top acting. I found myself laughing out loud. I kept expecting the guys from MST3K to show up and start heckling the game. The puzzles run the gamut from easy to difficult. Beware, some of the hidden object puzzles have bad clues where the noun it gives you for an object to find is not really what that object is. I missed the "no hints" achievement because I had to use a hint to find one of them. On the whole, however, this is a fun game. Play it if you want a good chuckle.

. Can't recommend this Game but first of all the Pro's:

- Character Customization is decent.
- Characters itself look okish.
- The Class System seems promising.
- No Tab targetting.

-Good Optimization

Now we come already to the many Con's:

-No Tabtargetting and yet "Press 0-9 to use Skill XY"

-Genderlock doesn't work here at all.

-To much running around in Town.

-Controls are clunky

-Gameplay is clunky

-everything feels clunky

-Leveling feels pretty slow.

-Gamepad is supported, but makes no sense at all.

-P2W (Gear\Weapons and whatnot buyable with real Moneyz.)

-Doesn't save Graphic Settings

Overall the Game feels like a Prototype that could've turned into a good Game, but just didn't. The Class System seemed nice, the Character Creation was ok, but f.e the Tutorial started already... Lame. It could've been "something", but it's just not.

I played a total of 2,5 Hours. That was enough for me, to make a myself a Picture about the Game.

*Steam did not reckonize the Game anymore after the first Start. Whatever was the Reason, I don't know.. the usra light pacific is cool

for some reason when I log in to Aftermath it acts like it has no servers for pve and pvp at all so I can't even play the game please fix this. Great game - while I'm not really into the regular mode since I never know which way to face, I play the Grav Bomb version all the time. It's a good workout and has very addictive game mechanics.. There's an interesting system in place here, combining turn-based tactics with a Hearthstone-style CCG. Problem is with the pacing. It feels janky, and dealing with rush tactics is problematic. Not to mention, games like Hearthstone sell themselves on personality, which is hard to do when 80% of your cards use placeholder art. I know, game's in Early Access, but as it stands I have no real desire to spend any more money on this game as-is.

Then there's the matter of the community. If you look at the Steam discussion page, it's a bunch of edgelord 12 year olds who don't understand punctuation, and can't even provide feedback to the devs without crapping all over each other. Not that the Steam forums are typically a source of intelligent discourse, but this is one of the worst communities I've seen. Could you imagine what would happen if they implemented an in-game chat feature?

I'll keep my eye on this, but it's got a long way to go if the devs really want in on that Twitch dosh. I will update this review should my opinion change.. For NF1 players, gotta keep hoping. I'm an old Jedi member from Navyfield 1 and was excited to play Navyfield 2 since they first announced they were working on it. I really enjoy fast pace strategic games, like Starcraft and such so NF2 was on the list.

Two days into it, I have a tier 3 BB with tier 2 DD. The complexity of NF1 is gone, same with the common public player strategies. Everyone rushes in to the middle and it creates a bloodbath, even ships that have far enough ranges to kite rushes in and sinks within seconds. No one hardly speaks on chat but when someone finally did, it was to call me a "noob bb" because I was the last one left vs 4 and I was kiting, I was able to sink 3 with lots of hits on others, racking up a simple 98k damage and coming in first place on my team at the end when I was sunk.

That's how we played in NF1(200k dmg+), with other like minded players it became an amazingly fun mental battle. The fact that even the majority of the high tier ships rush in to die in seconds, no dodging or weaving, probably auto aim, possibly bots (no chat or common sense), and some just don't even shoot back makes this game's gameplay lame. The freedom of customized ships is gone and the community feels dead. If you miss NF1 and wanted to play like the old times with just updated graphics, this game is not it.. Not bad, but still needs improvements. I don't like the fact that after the winter is over I lose a lot of stuff from my cupboards. I know some of it is used to survive the winter, but that much, takes too long to stock up. Has some graphics glitches but nothing too serious. The towns are too repetitive, needs different buildings made out of different materials. I'm giving it a thumbs up because it has a lot of potential to grow and become much more enjoyable. Definitely needs more animals. All I've come across so far are pigs, rabbits and deers. I know it's still early days yet so I'll just be waiting for more content to be added. Still enjoyable to play.. Short simple, it doesn't save on a cloud, I lost 70 hrs because I have to reset my PC, \u2665\u2665\u2665\u2665 this game, why even have an "online" feature if not for saving???. It's a one time day game I recommend it. This game is very unpleasant to play. It might be more fun on a tablet, but on a PC, it's awkward and confusing. I do not recommend this game.

It's bad enough that it's the first and only time I ever asked Steam for a refund.

They politely declined. :-\ . I am a big fan of well made narrative driven game experiences such as this one. It offers you very pleasant voice acting, harmonious soundtrack, fascinating, surreal, weird atmosphere and decent graphics. Gameplay is overall relaxing, aside from some "challenging jump sequences".

You can save and quit at any time. The vast game world provides alternative locations, away from the main path, to explore. There you will find additional, story related information. The story itself is dealing with the question, what is the Genie? At the beginning, it's up to you to decide which path (out of two) you choose. Without knowing the outcome of your decision. The chase is on.

So if you are fine with just exploring and enjoying the beautiful world of Drizzlepath, it's a clear must have. . Thy sword is a game that is perfection in a confined space. Retro to the bone and great fun to play. Highly recommended

- Fun and compelling gameplay

-
- Satisfying action/combat
 - Well designed pixel art visuals
 - Awesome music
 - Rogue lite elements
 - Random and unexpected events
 - Unlockable playable characters
- Thy Sword was covered by myself and my friend ToborPrime in our Game development/industry podcast - <https://www.youtube.com/watch?v=B-se22geVuk&t>
